1. The examiner's statement of reasons for allowance mailed out 12/14/05 is insufficient because it reflects only claims 1-10, but not claims 16-24. The following one is provided for more details.

The following is an examiner's statement of reasons for allowance: none of prior art of record taken alone or in combination shows a power converter comprising a transformer having a primary winding and a secondary winding, a transistor, a current sensing device, a feedback controller, a controller along with specific electronic connections among those elements and particular functions thereof and more detailed elements as recited in the claims 1-10 of the instant application; and a microcontroller coupled to the transistor for turning on and off the transistor and coupled to the feedback controller for receiving the signal indicative of an output voltage of the power converter, and further performing an analog comparison of a signal representative of the current flowing through the primary winding against a reference signal, and communicating with external circuitry to receive at least one signal for a control command for the power converter and to send at least one signal indicative of the status of a condition in the power converter as claimed in claims 16-24. .

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
